Mr. Harold Weisberg
Route 12m
Frederick, Maryland 21701

Dear Mr. Weisberg:

I greatly appreciate your letter and the CIA documents. I'm enclosing a check which, I hope, will cover postage and reproduction.

My interest in this matter is from the view of an LSD researcher who is trying to understand the effect such drugs have on human mental functioning. The national security organizations have done things that a researcher would not dare do. I can, pretty much, figure out what happened in the Olsen case from the released materials and from what I know of LSD.

I do hope you get the additional items you have requested. If any of them deals with psychochemicals, I would appreciate seeing a copy.

Sincerely yours,

Sidney Cohen, M.D.
